## **Make Money in 4 Easy Steps**

Step (1)

**Sign up with this secret website.**

this seems to keep it to themselves so that they alone can make all the money. Not anymore. Click below and create an account – it is 100\$ free. Only your username / email and password are required. Don't argue, just do this step now bore proceeding. You will find out later how important this site is in our mission to make money online.

**[Click Here Now to Sign Up 100% Free!](#)**

Do the above now as it will not take more than 2-3 minutes. You will need to go to the email address used to sign up and confirm / verify your email. That is all it takes to register. Make sure you use your best email address.

Step (2)

### **Get access to predictions.**

In case you signed up with the site I showed you in step one, you would have seen that it is a site providing FREE Daily FOOTBALL, ICE HOCKEY AND TENNIS PREDICTIONS. **Yes you read right.**

In case you did not sign up yet, do so now. It is completely free and takes 2-3 minutes to do so.

**[Click Here Now to Sign Up 100% Free!](#)**

After signing up, you will be asked to verify your email. Just sign into the email address you used and you will see a mail from the company. You need to open it and click on a link which says to Confirm or Verify. In case you cannot find this important email in your inbox, make sure to check your spam folder. It is likely to be there.

Most of the emails are incorrectly going to the spam box now. You need to be checking your spam box too, not just the inbox.

The computer software is still a machine and not human and do make a lot of mistakes.

Once you confirm your registration, you can log into the site and see the predictions for the day and the next day. Select any sport you like to bet on. For me it is Football.

In case after you sign up, you cannot find the email from the company either in your inbox or spam folder within the same day, you can wait and sign up again the following day. I am sure you will go through the second time.

By following day, if you cannot still find the email, you can go ahead and sign up again at the above link using same email and select your password.

Step (3)

## **Place a bet in the bookies!**

Having registered and selected games from step 2, the next thing is to place the Bets with a local sport betting company online in your country. Now they are so many online sport betting companies located in every country of the world right now. Just use Google to locate the ones in your country. Go with those in your locality. No need having to go abroad for this as this may take time and you can be asked for documentation. You do not need to waste valuable time with this step.

Step (4)

## **Get your money!**

This is the sweet part. Each day you select and place your Bets. At the end of the games, you take your winnings. Nothing can be sweeter than this.

## **Conclusion**

Having signed up with the [free sport prediction company](#), set aside an amount for your Betting business – yes that is what it is. It is a business and not a thing to pass time with. Those who are successful with sport betting are those who treat it as a business. They set aside a capital (Bank) for this and stick to it. They are disciplined and bet in a systematic way. Yes they follow a system like the one I have just given you in this book. They follow a system and stick to it long term.

Start with the Free selections and move to the Premium selections as soon as you can – that is where the money is. You can start with the free tips, make some money, and then upgrade to the Premium selections or Tips.

Good luck. May you make a lot of Moola. Amen!

### **What is Sport Betting.**

According to the Wikipedia, *Sports betting* is the activity of predicting *sports* results and placing a wager on the outcome. ... *Sports* bettors place their wagers either legally, through a bookmaker/sportsbook, or illegally through privately run enterprises referred to as "bookies"

### **Can you make money with Sport Betting?**

Yes you can make money betting on sports. The number **one** reason most people lose money with **sports betting** isn't because of poor picks but instead, it is because of poor **money management in sports betting**. There are far more bettors who can pick winners than there are who **can make money**, and **money management** is the key. Let me explain below.

### **What is Money Management in Sports?**

This involves setting out a specific amount for your betting business. Yes it is a business like I said earlier and the sooner you start treating Sport betting as a business, the earlier you will begin to make money with this. You have got to set aside a specific amount e.g. **\$100 - \$500** as your betting capital or Bank as we call it I this business. You will divide this into 20 places (i.e. 5% each) and use that as the maximum per bet. Let's take for example, you have \$500 was your Bank. The maximum you can use per Bet is \$10. That means out of this \$500, you will only use \$10 per each bet and you will be consistent with this. Each day you will place \$10 per bet, no matter the number of Bets you place in a day. It must be \$10 or 5% of your BANK per Bet. You maintain this amount until you double your bank, then you can recalculate a new 5%. This is how you manage your betting capital or Bank.

Now imagine what happens where there is no money management. You place 2 games at \$50 each and lose. That is \$100 down out of whatever money you have. The next 3 picks you have, you are afraid of losing. You then decide it will be \$5 each and then you win. Imagine you just got back the \$5 each, which amounts to \$15. You are still short by \$85.

Imagine that you know about money management. You spent \$10 on the first two picks and lost. That is \$20 gone. Then you place \$10 each of the next 3 picks and win, that is \$30 won,

leaving you with a net profit of \$10. You see the different results that we have from the same case scenario. This is the main difference between a professional bettor and an Amateur Bettor. The first one is a Winner while the second is a Loser. You do not want to belong to the second group. You are a Winner!

## **Why is Sport Betting One of the Best Ways to Make Money Online?**

Answers!

You don't need a website or Blog.

You don't need Traffic.

You can make money daily with it.

You can start today and not next week.

And so many more reasons.

## **Why Many People Fail at Sport Betting.**

Refer to the part about Money Management in sport betting above. That is the main reason.

## **How You Can Overcome and Be Profitable in Sport Betting.**

Set apart a specific amount as your betting bank, no matter how much. Set aside this money and stick to using it at a maximum of 5% per bet. This means that for you to run out of your betting bank, you need to have a running loose of 20 straight bets – almost impossible in sports betting.

Start with a small amount e.g. \$100 and use this as a test run. If you lose this amount because you are not disciplined and failed to stick to the money management rule above, you can always start

with another amount. Do not go running with a huge amount from the beginning e.g. \$10,000. Start small and grow up.

You might make mistakes with your bets at the beginning. This is all normal. That is why I advice that your start with a small amount and progress with that. As you gain experience and improve on your betting business, you can then increase your bank or capital. This is a wise advice – stick to it. It is proven and works to tee. Don't try reinventing the wheel. Stick to what we know that works.

Thank you so much.
